CS 2450: Software Engineering
Spring 2019

Course Description
This course introduces topics in current software engineering theory and practice. Students will also learn through interactive application of software engineering concepts by way of a semester-long team project.

Course Fees
Course fee: $25, used to assist in maintaining CIT infrastructure.

Meeting Times
MWF 3:00 pm - 3:50 pm in Smith 108
Final exam: Wednesday, May 1, 3:00 pm - 4:50 pm

Instructor
Ren Quinn
Email: ren.quinn@dixie.edu
Office: North Burns 228
Office Hours: MTWRF 12:00 pm - 1:00 pm

Schedule

Course Objectives
By the end of the course, students will be able to:

- [Professional Knowledge] Show understanding of software engineering knowledge and skills and of the professional standards necessary to begin practice as a software engineer.
- [Technical Knowledge] Demonstrate an understanding of and apply appropriate theories, models, and techniques that provide a basis for problem identification and analysis, software design, development, implementation, verification, and documentation.
- [Teamwork] Work both individually and as part of a team to develop and deliver quality software artifacts.
Perform Trade-Offs] Reconcile conflicting project objectives, finding acceptable compromises within the limitations of cost, time, knowledge, existing systems, and organizations.

[Continuing Professional Development] Learn new models, techniques, and technologies as they emerge and appreciate the necessity of such continuing professional development.

*See ACM's Curriculum Guidelines for Undergraduate Degree Programs in Software Engineering

**Resources**

**Textbook**

There is no assigned textbook for this course. Readings will be assigned from online sources.

**Computer Labs**

You may use the computers and software in the Smith Computer Center.

**Course Web Site**

Assignment submissions and grades will be managed in Canvas and Gitlab.

**Assignments and Exams**

**Reading**

Students are responsible for reading the material in this course. This includes reading the material before the class in which it is discussed. Students are encouraged to bring questions about the reading to class or to office hours.

**Assignments**

Assignments will be given to allow students to practice/review the skills/theory discussed in class. This includes making progress on a semester-long group project.

**Quizzes**

This course will have a handful of quizzes throughout the semester. Quizzes are designed to check understanding of the course topics, and to promote the course objectives. Quizzes will be short in-class activities, and graded on participation. All quizzes will be weighted equally.

**Exams**

There will be one midterm exam and one final exam.

**Grading**

Grades will be weighted as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assignments/Readings</td>
<td>33%</td>
</tr>
<tr>
<td>Project</td>
<td>33%</td>
</tr>
<tr>
<td>Exams (Midterm/Final)</td>
<td>33%</td>
</tr>
</tbody>
</table>

Letter grades are assigned based on the percentage of possible points attained, according to the following chart:

- >= 94 A
- >= 90 A-
- >= 87 B+
- >= 84 B
- >= 80 B-
- >= 77 C+
- >= 74 C
- >= 70 C-
- >= 67 D+
- >= 64 D
Course Policies

Attendance

Students are responsible for material covered and announcements made in class. School-related absences may be made up only if prior arrangements are made. The class schedule presented is approximate. The instructor reserves the right to modify the schedule according to class needs. Changes will be announced in class. Exams and quizzes cannot be made up unless arrangements are made prior to the scheduled time.

Occasional absences are acceptable as long as the student keeps up with assignment work. Students who miss any scheduled exam (including midterm exams and the final exam) without making prior arrangements will receive a failing grade.

This course can only be completed by attending classes and completing all assigned work to a satisfactory level. There is no procedure for testing out of the class.

Collaboration

Collaboration with other students in the course is encouraged, particularly within assigned groups. Students may also seek help learning concepts and developing programming skills from whatever sources they have available, and are encouraged to do so. Each student must prepare his/her own solution to each assignment. See the section on cheating.

Cheating

Cheating will not be tolerated, and will result in a failing grade for the students involved as well as possible disciplinary action from the college. Cheating includes, but is not limited to, turning in homework assignments that are not the student’s own work. It is okay to seek help from others and from reference materials, but only if you learn the material. As a general rule, if you cannot delete your assignment, start over, and re-create it successfully without further help, then your homework is not considered your own work.

You are encouraged to work in groups while studying for tests, discussing class lectures, discussing algorithms for homework solutions, and helping each other identify errors in your homework solutions. If you are unsure if collaboration is appropriate, contact the instructor. Also, note exactly what you did. If your actions are determined to be inappropriate, the response will be much more favorable if you are honest and complete in your disclosure.

Where collaboration is permitted, each student must still create and type in his/her own solution. Any kind of copying and pasting is not okay. If you need help understanding concepts, get it from the instructor or fellow classmates, but never copy another’s code or written work, either electronically or visually. The line between collaborating and cheating is generally one of language: talking about solutions in English or other natural languages is usually okay, while discussions that take place in programming languages are usually not okay. It is a good idea to wait at least 30 minutes after any discussion to start your independent write-up. This will help you commit what you have learned to long-term memory as well as help to avoid crossing the line to cheating.

College Policies

Click on this link: https://academics.dixie.edu/syllabus/ for comprehensive information on the Semester Dates, the Final Exam Schedule, University resources such as the library, Disability Resource Center, IT Student Help Desk, Online Writing Lab, Testing Center, Tutoring Center, Wellness Center and Writing Center. In addition, please review DSU policies and statements with regards to Academic Integrity, Disruptive Behavior and Absences related to university functions.

If you are a student with a medical, psychological, or learning disability or think you might have a disability and would like accommodations, contact the Disability Resource Center (652-7516) in the North Plaza. The Disability Resource Center http://dixie.edu/drcenter/ will determine eligibility of the student requesting special services and determine the appropriate accommodations related to their disability.
