**CS 3500: Application Development**

**Assignment: Android Project**

**Requirements**

- Create an Android application of your own design for any supported platform (phones, tablets, Glass, Wear, TV, Auto).
  - Use Android Studio and the Android SDK to build your application.
  - The technical complexity and required effort should match or exceed that of the previous practice assignment.
  - To receive credit, your application must compile and properly function according to your original design.
  - Your project can be a smaller part of a larger application, but it should be functional and working on its own.
  - Prior to starting, share your application idea and design with the instructor to have it approved.

**Resources**

- Refer to the [Android developer documentation](#) as needed when completing your assignment.

**Submission**

- Show your completed assignment to the instructor during class or office hours to receive credit.
