

CS 3500 Fall 2020 Final Name _____

Open book, notes, and internet, but no live communication (or other obvious forms of cheating).

Solve any 2 of these for 50 points each. Pass them off with me as you go.

1. Lazy Man's Free Cell. Have FIVE free cells, four end cells, and NINE start cells. The first 7 start cells should initially be dealt 6 cards, and the remaining 2 should be given 5 cards each. All other play should remain the same.
2. Enhance C# Video Player with buttons that skip back 10 seconds and skip forward 10 seconds. Be sure to handle the cases where you are not yet 10 seconds into the video and where you are within 10 seconds from the end.
3. Have a cool picture for the form1 background of your VB tax calculator, and a different cool picture for the setup background.
4. Enhance the QT assignment so that every time the user clicks your button it adds another "Hello" to a ListBox.
