CS 4320: Machine Learning

Final Project

Pick a learning project you would like to complete. The project can be to go more in-depth using any of the learning methods we have covered this semester, combining learning techniques, or exploring a new learning technique.

Assignment Requirements

• This is a triple assignment, so the amount of effort in the assignment should reflect this.
• You may base your work off of a previous assignment or example, but must extend it in a significant way.
• Report the project chosen and the work completed, along with the results.
• Submit the code and the report to Canvas.
