**IT 1100 : Introduction to Operating Systems**

**First Day of Class**

**Accounts**

- To complete the homework for this class you need to have a CIT account. This should be done during the first week of school (accounts will not be created before the first day of class each semester). If you already have a CIT account you don’t need to create a new one as long as you were in CIT courses last year. To create an account goto: [https://cit.dixie.edu/facilities/passwd/passwd.php](https://cit.dixie.edu/facilities/passwd/passwd.php)

- If you have problems creating your CIT account or if you have forgotten your password, email your name and student ID number to [citadmin@cs.dixie.edu](mailto:citadmin@cs.dixie.edu) with a short explanation of your problem.

**Overview of course**

Welcome to Class!

- [Website](#)
- [Syllabus](#)
- [Canvas](#)

**Coursework**

You will have

- **Reading** assignments and a **Practical** assignment due each week
- **Quizzes** as scheduled by your instructor
- 4 exams consisting of two parts: a in-class **Practical Exam** and a **Multiple Choice Exam**
- The final will also consist of two parts: a **Comprehensive Practical Exam** and a **Comprehensive Multiple Choice Exam**

An approximate course schedule is posted here. [Schedule](#).

Watch Canvas for the exact schedule.

**Assignments**

Most assignments are autograded. There are a few where a submission will be required in Canvas.

**Resources**

We have a number of resources we will be using to learn the material for this class. Our main textbook referred to as WES is online here: [TextBook](#)

In this class we will be learning about operating system installation, partitioning, file systems, program management and security. We will focus on the Linux family of Operating Systems - specifically the Ubuntu distribution.

However, much of what we will learn is generic to all computers. The concept of command line will help you no matter which OS you use at work and home.

*A linux installation has already been prepared for you. You will learn how to access it from home. You don't need to install Linux on your own computer.*
Other Important Stuff

Your instructor will inform you of his/her

- preferred contact method
- office hours
- late policy
- anything else

Smith Computer Lab

The Smith Computer Lab has been provided for your use and convenience in completing your homework. To log into the lab computers and all computers in the Smith Computer Center Classrooms you will use your CIT login.

Labbies (Those good looking people in the red vests) have been provided in the Smith Computer Lab to assist you with homework. Depending on the number of students desiring their assistance there is a 1-5 minute time limit per question. If you require longer or more indepth assistance contact your instructor or fellow classmates. We are all here to help you succeed.

Class Goals

The object of this class is to help you know the correct answers to the following when logged into a Linux computer.

1. Where am I?
2. Where do I want to be?
3. How do I get there?
4. What do I want to do when I get there?
5. How do I do it? Can I Google it and understand the answer?
6. How do I check my work?
7. How do I fix my mistakes?
