Caching Lookup steps

- Install bind9 if necessary

- Configure hosts to do lookups for in `/etc/bind/named.conf.options`

- Configure for query logging in same file

- Restart bind9

- Test

- Repeat for each lookup server
- dig from local host for non-authoritative data.
- dig from network systems for non-authoritative data.
- dig from outside network for non-authoritative data.
- dig from outside network for authoritative data.
