ldconfig deferred processing now taking place
cgl@mail:/$ sudo dpkg-reconfigure uw-imapd
Please choose the server ports and protocols to activate.

imap2: IMAP 4rev1 on TCP port 143 with TLS support;
imaps: IMAP 4rev1 on TCP port 993 with SSL support;
imap3: (obsolete) IMAP 3 on TCP port 220 with TLS support.

It is recommended to activate both imap2 and imaps.

As the ports and protocols choice may have been overridden by local changes, you may need to enforce the choice and run the package configuration again with 'dpkg-reconfigure uw-imapd'.
Configuring uw-imapd

Server ports and protocols to support:

- imap2
- imaps
- imap3

<Ok>
Configuring uw-imapd

Server ports and protocols to support:

- imap2
- imaps
- imap3

<Ok>
The uw-imap daemon supports listening simultaneously on several ports.

As the ports and protocols choice may have been overridden by local changes, you may need to enforce the choice and run the package configuration again with `dpkg-reconfigure uw-imapd`.

Enforce port selection?

<Yes> <No>
cgl@mail:/$ sudo dpkg-reconfigure uw-imapd
You already have /etc/ssl/certs/imapd.pem
cgl@mail:/$
cgl@mail:/$ cat /etc/inetd.conf
