IT 3110: Systems Design and Administration II

LDAP Optimization

Assignment

This assignment will review LDAP and add optimization measures.

Tasks

- Use the LDAP system from the LDAP security assignment.
- Enable filter logging on the LDAP server.
- Use the client systems that use this LDAP server.
- Study the filters.
- Add all appropriate indexes to the LDAP configuration.
- Disable the filter logging.
- Test to be sure the system is working correctly.

Submission

- Be sure to do full testing.
