Replace menu.c32?

This ISO image seems to use an obsolete version of 'menu.c32'. Boot menus may not display properly because of this.

A newer version can be downloaded by Rufus to fix this issue:
- Choose 'Yes' to connect to the internet and download the file
- Choose 'No' to leave the existing ISO file unmodified
If you don't know what to do, you should select 'Yes'.

Note: The new file will be downloaded in the current directory and once a 'menu.c32' exists there, it will be reused automatically.
WARNING: ALL DATA ON DEVICE 'NO_LABEL (E:) [8GB]' WILL BE DESTROYED.
To continue with this operation, click OK. To quit click CANCEL.
