Docker 2

Description

By the end of this project you have:

- completed this tutorial. It is all of chapter 5.

Errata: Don’t use `uWSGI==2.0.8`, just use `uWSGI`.

- On the latter half of the project, when asked to use `docker-compose`, I had better luck installing the non-apt version as instructed here.

To Pass off

Prove that you have done it. We will pass this off in class.
