**Review 2**

Be comfortable with the following:

- LVM
  - Creating pv, vg, lv
  - extending/shrinking?
  - removing
- Remote
  - NFS
  - Connect to my share
  - Set up your own nfs server and directory
  - iSCSI
  - Connect to a target
  - Set up your own target
- GPT/UEFI
  - Can’t think of any practical things here
