

IT4400 Guest Lecturer Worksheet

Guest: _____

Date: _____

Please write a paper, minimum of one page, summarizing the guest lecturers discussion and your thoughts of overall network design, performance, infrastructure and facilities. Below are a few questions you can use to gauge your questions. Don't limit your questions to JUST THE ONES BELOW! For your summary use 1.5 spacing, Courier size 10 or 11 and upload to Canvas by the start of the Next Class. Do not just answer the questions, but make it a paper that can be read well.

1. What kind of connection(s) and bandwidth available to the Internet does the organization have?
2. What kind of redundancy methods and devices in use at the organization?
3. IPv6? When, how, why?
4. What services does the organization offer?
5. What kind of power backup facilities are in place?
6. Plans for growth and expansion?
7. What kind of things do you find unique about this organization?
8. What kind of IT requirements are needed to support multiple locations?
9. What different locations are served?
10. Any other insights or questions you found interesting?
