Syllabus Website Canvas LabSim

Activity 1

Use the following sites (or others) to find 2-3 security breaches (5min):

- [http://datalossdb.org/](http://datalossdb.org/)
- google.com
- [http://www.us-cert.gov/](http://www.us-cert.gov/)

Take a few notes on the breaches you find. Can you determine what happened? Why it happened? What the organization did to remedy it? How much it cost them to fix it? Was it preventable? Be prepared to share your findings.
