- Review Module 0 as needed
- Complete all the materials associated with Module 1 (135 minutes)
- Work through Module 2.0.1 (70 minutes) then complete:
  - Lab 1 (45 minutes) (Introduction to EC2)
- Complete Module 2.0.2 (75 minutes) then complete:
  - Lab 2 (45 minutes) (Working with EBS)
- Complete Module 2.0.3 (40 minutes) then complete
- Lab 3 (45 minutes) (Build your VPC and launch a web server)

### Week 2

**In Class:**
- Questions
- Review of previous week contents (15 minutes)
  - [Kahoot - Module 1](#)
- Walk through ancillary lab with students (30 minutes)
  - [Extra lab 1](#)

**Before Next class:**
- Module 2.0.4 (55 minutes)
- Lab 4 (45 minutes) (Build your DB server and Interact)
- Module 2.0.5 (35 minutes)
- Lab 5 (45 minutes) (Scale and Load Balance your architecture)
- Module 3
- Lab 6 (45 minutes) (Intro to AWS IAM)
- Modules 4 and 5 (90 minutes)

### Week 3

**In Class:**
- Questions
- Review of previous week contents (15 minutes)
  - [Kahoot - Module 2](#)
  - [Kahoot - Module 3](#)
- Exam Review
  - [Extra lab 2](#)
  - Practice Exam
- How to register for real exam
  - Discount codes

**Before Next Class:**
- Take the real exam
**Week 4**

- Take the real exam sometime this week.

**Week 5**

In Class:

- Begin ACA curriculum
- Start in on Module 1 (30-40 minutes)
- Introduce Lab? (10 min)
- Homework tasks (3 min)

Before Next class:

- Finish Module 1 (~100 minutes)
- Module 2 (154 minutes)
- Module 3 (120 minutes)
- Lab 1 (Making your Environment Highly Available)(45 min)

**Week 6**

In Class:

- Review/Questions (10 minutes)
- Kahoot
  - Module 2
  - Module 3
- Exercise #1 (Improve this architecture)(5 min)
- Exercise #2 (Improve this architecture)(5 min)
- Group discussion 1 (Forklifting an Existing Application) (20 min)
- Introduce Labs (10-15)
- Homework tasks (3 min)

Before Next class:

- Complete Module 4 (124 min)
- Lab 2 (Using Notifications to Trigger AWS Lambda)(45min)
- Module 5 (110 minutes)
- Module 6 (65 minutes)
- Module 7 (118 minutes)
- Lab 3 (55 min, Automating Infrastructure Deployment with AWS)

**Week 7**

In Class:

- New labs
- Questions (10min)
- Exercise 3 (Improve this architecture)(10min)
- Project #1 Introduction (20 min)
- Project #1 Role Play (30 min)
- Homework tasks (3 min)

Before Next Class:

- Module 8 (60)
- Module 9 (60)
- Module 10 (170)
- Module 11 (96)
- Lab 4 (Implementing a Serverless Architecture with AWS managed services)(30)
- Lab 5 (Introducing Amazon cloudfront)(40)
- Work on project 1(up to 10 hours)

**Week 8**

In class:
- Questions (3)
- Project 1 Presentations (45)
- Reviews
  - Kahoot module 8
  - Kahoot module 9
  - Kahoot module 10
  - Kahoot module 11
- Exercise #4 (Improve this Architecture) (10) - module 11
- Homework tasks (3 min)

Before Next class:
- Module 12 (52)
- Module 13 (124)
- Module 14(56)
- Module 15(86)
- Lab 6 (Multi-Region failover with Amazon Route 53)

**Week 9**

In class:
- Reviews
  - Kahoot module 12
  - Kahoot module 13
- Exercise #5 (Improve this Architecture)(5)
- Exercise #6 (Improve this Architecture)(5)
- Exam Review
- Homework: (submitted electronically within a week)
- Introduce Project #2 (30 min)
- Project #2 (up to 10 hours)
- Exam Codes

Before next class:
Take practice exam Work on Project #2

**Week 10**

In class:
- Present project #2
- More Review

**Remaining weeks**

- Take the real exam
- Retake if necessary
