In Class:

- Begin ACA curriculum
- Start in on Module 1 (30-40 minutes)
- Introduce Lab? (10 min)
- Homework tasks (3 min)

Before Next class:

- Finish Module 1 (~100 minutes)
- Module 2 (154 minutes)
- Module 3 (120 minutes)
- Lab 1 (Making your Environment Highly Available) (45 min)

**Week 6**

In Class:

- Review/Questions (10 minutes)
- Exercise #1 (Improve this architecture) (30 min) (Group project)
- Exercise #2 (Improve this architecture) (30 min) (Group Project)
- Group discussion 1 (Forklifting an Existing Application) (20 min)
- Introduce Labs (10-15)
- Homework tasks (3 min)

Before Next class:

- Complete Module 4 (124 min)
- Lab 2 (Using Auto-scaling with AWS Lambda) (45 min)
- Module 5 (110 minutes)
- Module 7 (118 minutes)
- Lab 3 (55 min, Implementing a Serverless Architecture with AWS managed services)

**Week 7**

In Class:

- Exercise 3 (Improve this architecture) (40)
- Group discussion #2 (Scalable Web Application) (45 min)
- Project #1 Introduction (30 min)
- Homework tasks (3 min)

Before Next Class:

- Module 8 (60)
- Module 9 (60)
- Module 10 (170)
- Module 11 (96)
- Lab 4 (Multi-region failover with route 53) (30)
- Work on project 1 (up to 10 hours)

**Week 8**

In class:

- Exercise #4 (Improve this Architecture) (40)
- Introduce Project #2 (30 min)
- Send students exam codes
- Homework tasks (3 min)

Before Next class:
• Module 12 (52)
• Module 13 (124)
• Module 14 (56)
• Module 15 (86)

**Week 9**

In class:

• Exercise #5 (Improve this Architecture) (40)
• Exercise #6 (Improve this Architecture) (40)
• Exam Review
• TODO: Design review and review questions
• Homework: (submitted electronically within a week)
• Project #2 (up to 10 hours)

Before next class:

Take practice exam Work on Project #2
