CS/WEB 4200: Web Application Development II  

Assignment: WebSocket  

Requirements  
- Within a new or existing Node.js and Vue.js application, implement one or more features which add interactive, bidirectional client-server communication using the WebSocket protocol.  
  - For Node.js, use the [Node.js WebSocket library](#).  
  - For Vue.js, use the WebSocket API that is provided by the web browser.  
- Deploy your finished application (including both the Node.js server application and the Vue.js client application) to Heroku.  

Resources  
- [Node.js WebSocket library](#)  

Submission  
1. Show your completed assignment to the instructor during class or office hours to receive credit.  
2. Submit your project using Git and GitHub. Start by creating a repo for this assignment [here](#).
